Main Responsibilities

- Presents products and solutions to customers alongside members of the sales department
- Understands and captures the information security requirements of the customer
- Designs solutions that cover customer needs in the information security field
- Compiles RFI and RFP technical proposals
- Researches the market needs and proposes new products and solutions for the corporate portfolio

Professional Experience & Qualifications

- BSc degree in Computer Science or Information Technology; a MSc degree is desirable
- At least 2 years of experience in a technical presales position
- Proficient knowledge of ICT systems, services and solutions, including:
 - security product technologies, including Next Generation Firewalls / UTM, VPN, WAF, Patch Management, 2FA, MDM, CASB, PIM/PAM, Database Security, SIEM
 - enterprise networking technologies (switching, routing, firewalling, wireless, BRAS)
- Possession of Information Security or Network related certifications is desirable
- A customer service orientation combined with efficient communication skills
- Strong analytical and problem-solving skills, with attention to detail
- Ability to communicate effectively technical information to non-technical staff
- Ability to work efficiently both within a team and independently
- Fluency in Greek and English languages, oral and written

We Offer

A competitive compensation package, a stable and enjoyable working environment, excellent opportunities for professional development, working on leading-edge technology and industry trends.
